DETAILED ACTION

Claim Interpretation

1. Claim 1 recites "a cleaning agent composition essentially containing carbon dioxide and a cleaning component...", which is interpreted as a cleaning agent composition consisting essentially of a carbon dioxide and a cleaning component.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 1, 5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recited in claim 5 "cleaning agent composition **further contains 1% by mass or more an alcohol**" constitutes an indefinite subject matter, because claim 5 depends on claim 1, wherein the transitional phrase "essentially containing", which is interpreted as consisting essentially of, is recited, thus limiting the composition to "materials or steps "and those that **do not materially affect** the basic and novel characteristic(s)" of the claimed invention, consult *In re Herz*, 537 F.2d 549, 551-52, 190 USPQ 461, 463 (CCPA 1976). The addition of alcohol, however, will materially affect the claimed method, because the presence of alcohol in cleaning composition will

Art Unit: 1746

enhance the cleaning ability of such composition, thus materially affecting the cleaning process.

4. The recited in claim 1 "high pressure" constitutes an indefinite subject matter, because the term "high" is a relative term which renders the claim indefinite.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Koch (U.S. 6,331,487).

Koch teaches a method of removing residues from semiconductor substrate by contacting the substrate with the cleaning composition, prepared by mixing pressurized carbon dioxide with hydrogen fluoride, wherein the concentration of hydrogen fluoride corresponds to the instantly claimed values. Regarding the instant claim 4, since Koch teaches that preferably the cleaning composition includes only carbon dioxide and HF, the presence of water in such composition is expected only in trace amounts, which corresponds to parameters recited in the instant claim 4 (col.2, lines 22-25, 55-63; col.3, line 3, lines 11-15).

Therefore, all the limitations of the instant claims are met by Koch.
